

11/17

What have I worked on?

- We worked on and presented checkpoint A during the lab.
- Found health data that would be relevant to our project and did some analysis.

What will I be working on next?

- Work towards completing deliverable 2 for submission on Monday.

Have I run into any issues? Do I need help?

- We brought up issues with regards to the lack of variation in air quality data due to very few sensors available. We need clarification on what exactly is expected of us for deliverable 2 for monday as there are many ideas being floated around.

Team Lead: Have I talked to the client recently? When are we meeting with them next?

- No. But Hemanshu did talk with our professor regarding next steps for our project as well as the TA and our TPM has been updating us via slack about potential changes.
